

GALACTIC 3D MANUFACTURING & ENGINEERING SOLUTIONS

Official Company Brochure & Capability Overview

1. ABOUT GALACTIC 3D

Galactic 3D is a premier provider of high-precision manufacturing, rapid prototyping, and industrial engineering services. We serve global leaders across Automotive, Aerospace, Medical Devices, Defense, Heavy Engineering, and Industrial Manufacturing.

2. ADDITIVE MANUFACTURING & 3D PRINTING

- High-resolution 3D Printing (SLA, SLS, DMLS, FDM)
- Rapid Prototyping for functional testing & low-volume production
- Metal 3D Printing in Stainless Steel, Titanium, and Aluminium alloys
- Reverse Engineering and CAD/CAM design optimization

3. PRECISION CNC MACHINING & TOOL ROOM

- 5-Axis CNC Milling, Turning, and Wire EDM
- Precision Components with tolerances down to +/- 0.005mm
- Comprehensive Tool Room capabilities for Jigs, Fixtures, and Custom Tooling
- Quality Inspection using Coordinate Measuring Machines (CMM) and Metrology

4. SHEET METAL FABRICATION & STAMPING

- High-speed Laser Cutting (up to 20mm steel sheet thickness)
- Precision Bending, Metal Stamping, Enclosures, and Robotic Welding
- Surface Finishing: Anodizing, Powder Coating, Electroplating, and Heat Treatment

5. INJECTION MOULDING & CASTING

- Plastic Injection Moulding with Cleanroom manufacturing for Medical Devices
- Die Casting, Sand Casting, and Investment Casting for heavy automotive parts
- Rapid Tooling and Mold Flow Analysis
